The International Center of Miami is one of the largest hospital-based international programs in America. Thousands of people each year travel to Miami from around the world to visit our respected physicians and our medical facilities. Our multilingual staff is trained to personally assist you with your medical and travel needs.

We're also committed to developing relationships with international physicians, medical associations and hospitals. We want to be the medical institution an international physician looks to when a patient requires urgent care or simply a second opinion. Some of the special services available to the international medical community include second opinions, video conferencing, continuing medical education courses, participation in medical conferences in their countries, and tours of our hospitals.

Our services include:

- 24-hour emergency on-call services
- Arrangements for jet or helicopter medical transport
- Coordination of hospital, physician and diagnostic appointments
- Assistance with travel arrangements, including scheduling of transportation to and from the airport
- Accommodations at nearby hotels that offer special discount rates

Our Facilities...

Baptist Hospital of Miami

Baptist Hospital's full range of medical and technological services is the natural choice for a growing number of people throughout the world. In 1998, Baptist was recognized as a Magnet hospital for Nursing Excellence by the American Nurses Credentialing Center, an affiliate of the American Nurses Association. At the time, Baptist was the first hospital in the state to receive the distinguished designation. In 2002, and again in 2006, Baptist Hospital was re-awarded Magnet status for excellence in nursing. The Magnet status remains in effect through 2010.

South Miami Hospital

Since it opened in 1960 as a 100-bed hospital, South Miami Hospital has kept pace with the area's growth in healthcare as well as the number of residents — expanding in size and continually updating its services to meet the community's needs. The hospital was recognized as a Magnet Hospital for Nursing Excellence in 2004 and again in 2008, by the American Nurses Credentialing Center, a part of the American Nurses Association. It was also on Solucient's list of top 100 hospitals in the country, based on several quality indicators.

Baptist Cardiac & Vascular Institute

The Institute offers a multidisciplinary team approach to preventing, diagnosing and treating cardiovascular disease. The Institute's philosophy — to treat the entire cardiovascular system as a single entity — sets it apart from other medical centers that treat the heart and circulatory system separately. Established in 1987, under the leadership of Barry T. Katzen, M.D., Baptist Cardiac & Vascular Institute houses state-of-the-art diagnostic, treatment and rehabilitation areas, as well as the most advanced endovascular suites in the world.

Baptist Children's Hospital

Long a leader in advanced pediatric care, Baptist Children's Hospital opened to bring together all health care services for children from birth to age 18. More than 200 pediatricians and 100-plus pediatric subspecialists in nearly every field, backed by pediatric-trained nurses and support personnel, offer their expertise at Baptist Children's Hospital. Among the services are a 24-hour Children's Emergency Center with child-sized equipment; intensive care units for newborns and youngsters; specialty clinics for diabetes, cancer, cystic fibrosis, heart disease and genetics.

Doctors Hospital

Doctors Hospital, located in the heart of historic Coral Gables, is a 281-bed acute care facility that has provided high-quality medical care since 1949. Doctors Hospital is recognized for its services in orthopedics, neurosurgery, sports medicine, general surgery, minimally invasive laparoscopic surgery and women's health. Its nationally recognized Sports Medicine program serves the Florida Marlins, the Florida Panthers, and the Miami HEAT, as well as collegiate teams from Florida International University.

Homestead Hospital

Homestead Hospital has been a part of the South Miami-Dade community since 1940, when local physician James Archer Smith opened it as a 10-bed hospital east of Krome Avenue. Today, Homestead Hospital is a modern, full-service 142-bed facility. Our new \$135 million hospital opened in May 2007, replacing the original facility. Homestead Hospital is proud to be a tobacco-free campus.

West Kendall Baptist Hospital

Scheduled to open in 2011, West Kendall Baptist Hospital will be a facility with surgical, emergency, maternity and diagnostic units. The hospital represents the first completely new, non-replacement hospital in Miami-Dade County in several decades. West Kendall Baptist Hospital will be built to withstand a Category 5 hurricane with winds of 180 mph. It will incorporate Leadership in Energy and Environmental Design standards in construction for environmental responsibility and sustainability.
