UHealth physicians offer state-of-the-art medical services at more than two dozen locations across South Florida. UHealth system includes University of Miami Hospital, UHealth's flagship, 560 private-room acute care hospital; Bascom Palmer Eye Institute; Sylvester Comprehensive Cancer Center; The Miami Project to Cure Paralysis; and the Diabetes Research Institute, among others. UHealth physicians also staff many internationally recognized clinical programs at Jackson Memorial Hospital, Holtz Children's Hospital, and the Miami VA Healthcare System.

UHealth International Services

UHealth International serves thousands of people each year from around the world who come to Miami for the compassionate patient care provided by 1,200 physicians and a team of over 8,000 employees. Our patients benefit from an academic environment that fosters discovery, innovation, and continued medical advancement. Our multi-lingual medical and administrative staff is sensitive to the cross-cultural needs of the international patient. Every patient is assigned a personal concierge coordinator whose primary responsibility is to facilitate every detail of the visit, including:

- Emergency access 24 hours a day
- Coordination of emergency air transportation
- Coordination of care with all specialties and sub-specialties
- Financial clearance for self-pay and insured patients
- Assistance with visa letters
- Transportation to and from UHealth campus
- Hotel and car rental discounts
- Support for accompanying family members

UHealth offers leading-edge patient care in more than 100 medical specialties and subspecialties; our clinical departments include:

Our Facilities

University of Miami Hospital

University of Miami Hospital is UHealth's flagship hospital. From emergency services and intensive care to life-saving surgeries and minimally-invasive procedures, the hospital delivers advanced care by the region's leading physicians. Located at the entry to UHealth's medical campus, University of Miami Hospital has 560 private rooms, state-of-the-art technology, and a caring and dedicated multi-lingual staff. University of Miami Hospital offers treatment for a wide variety of diseases and disorders.

Batchelor Children's Research Institute

The Department of Pediatrics consistently ranks among the top nationally in National Institutes of Health (NIH) funding for medical research. The award of NIH grants is a key indicator of research quality and competitiveness. This confirms the commitment of UHealth physicians and scientists at the Batchelor Children's Research Institute to the advancement of pediatric health through research and treatments which encompass the spectrum of pediatric diseases.

Bascom Palmer Eye Institute

UHealth's Bascom Palmer Eye Institute is a world-renowned specialty hospital committed to the protection and preservation of the treasured gift of sight. Rated the nation's best ophthalmic hospital in the country, Bascom Palmer's full-time faculty of internationally-respected physicians and scientists are skilled in numerous eye care specialties and recognized as leaders in ophthalmic care, research, and education.

Diabetes Research Institute

The Diabetes Research Institute (DRI) is a recognized world leader in cure-focused research. From innovations in islet isolation and transplant procedures to advances in cell biology and immunology, the Diabetes Research Institute is now harnessing the power of emerging technologies to develop new cell-based therapies to restore insulin production. It is the most comprehensive diabetes research facility of its kind; it also provides an array of diabetes management and education activities for patients and their families, as well as for professionals throughout the health care industry.

Sylvester Comprehensive Cancer Center

Sylvester opened in 1992 to provide comprehensive cancer services, and today, serves as the hub for cancer-related research, diagnosis, and treatment at UHealth. Since its founding, Sylvester has transformed cancer research and treatment in South Florida and beyond. Sylvester handles more than 1,500 inpatient admissions annually, performs more than 2,400 surgical procedures, and treats nearly 4,000 new cancer patients.

Miami Project to Cure Paralysis

The school's prestigious Miami Project to Cure Paralysis is housed in the Lois Pope LIFE Center. The state-of-the-art center is the mainstay of the University of Miami Miller School of Medicine's nationally and internationally recognized Neuroscience Research Programs. It brings together all elements of the multi-pronged assault on paralysis and other neurologic disorders, including stroke, brain trauma, and neurodegenerative diseases.
